Heavy Tactical Trucks

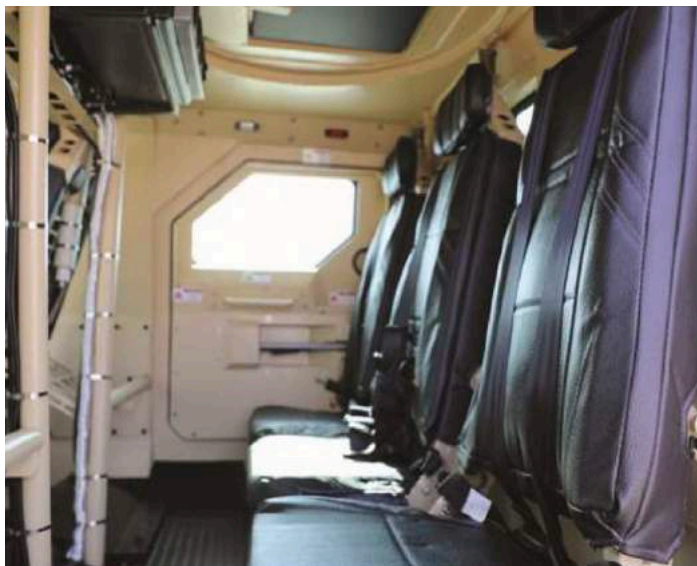

MULTI PURPOSE APC WITH EXCEPTIONAL OFF-ROAD PERFORMANCE:

The F-550 4x4 Armored Personnel Carrier is designed for versatile deployment, including various missions, peacekeeping operations, and convoy escort. Its impressive power and handling make the F-550 equally suited for urban and off-road environments. The vehicle offers excellent protection against both ballistic and blast threats, with crew compartment protection at CEN Level BR6 armor. It can be configured for a wide range of applications, from a battlefield ambulance to a fully armed direct fire vehicle. We offer a wide range of additional features that can be integrated during the manufacturing phase to ensure total compatibility, including rocket launch systems, remote-controlled weapon stations, smoke grenade launchers, night-vision high-speed cameras, and fully integrated intercom systems.

ARMORED SPARTAN-SUT-MAV:

FEATURES

- The winning combination of power, off-road capabilities and affordability
- Can be fitted with either manned or remotely controlled weapon station
- Gun Ports
- Ladder System and Fire Suppression System can be installed
- Ballistic steel-case fuel tank protection
- Winch
- Smoke Grenade Launcher

	Horsepower
	370 hp - 400 hp

	Transmission
	Automatic

	Seats
	5 Seats

	Fuel Type
	Diesel

	Fuel Capacity
	74 Gal

	Armoring Level
	STANAG 4569 Level 2 upgradable to Level 3

VIP ARMORED VEHICLES:

The BMS® VIP Armored vehicles are precision-built to exacting standards with innovative, lightweight ballistic armor, covering the vehicle with complete, all-around protection. The armoring technologies ensure the vehicle is secured to the ballistic protection level of CEN 1063 BR6 and higher while maintaining the vehicle's original features.

BMS® has implemented its new proprietary armored overlap system, which protects door seals by ensuring no bullets can penetrate them. Additional protective upgrades include sirens and PA systems, LED strobe lights, a blackout package, an engine bay fire suppression system, a door-assist mechanism to counteract the weight of armored doors, and much more.

The new BMS® Armored VIP vehicles are now available for worldwide delivery to all major seaports and airfreight upon special request.

ARMORED PICKUP TRUCKS:

BMS® armored pickup trucks are a remarkable fusion of rugged durability and advanced protection, crafted for those requiring unparalleled security. Unlike conventional armored vehicles, BMS has engineered these trucks to maintain the look and feel of a standard pickup while concealing their formidable defensive capabilities. Their design integrates cutting-edge ballistic materials with a reinforced chassis, ensuring maximum protection without compromising performance. Whether navigating urban landscapes or rough terrains, BMS armored pickups offer a unique blend of stealth, strength, and versatility, making them the ultimate choice for discreet, reliable security.
